CUT A FINE FIGURE

Whether you skate on blades or wheels, you should have one of those glamour outfits that the slickest chicks are gliding around the rinks in. We've snooped around some of the popular rinks around the country and here's our up-to-the-minute report. You'll have to get out your needles and thimbles, gals, cos none of this finery is for sale. It's for the making.

Velvet and Spangles—The big favorite among the gals who really go to town with figures in the middle of the rink is velveteen trimmed with spangles. They like the short, short princess dresses with square or sweetheart necklines. The swooniest one we saw was pale blue with the Able Grable's initials in sequins at one side.

Pants to Match—Some girls make themselves swirling plaid wool (white ground patterns preferred) with little matching pants that show on the swirls.

Oh, My Stars!—You paste silver and gold stars all over your white skate shoes and you look like something out of another world. You also paste stars all over a colored snood that holds your page boy in place.

Hem Hints—Sew your trimming inside the hemline of your skating skirts. Beads, buttons, spangles, even Christmas tree tinsel, are more effective when you only see a flash of them around the corners.

HEADSTARTS TO GLAMOUR

Was it only yesterday you were strewing flowers in your high pompadours and tying bows hither and yon among your curls? Was it only the day before yesterday that you were seeing the world through one eye with a Veronica Lake hair droop? And—today you go for velvet ribbon bands. Well, what about tomorrow? Here are the newest hair-do trends reported by our soda fountain sleuths. Get set, get ready and go! They're your headstarts to glamour!

Band Plus Barrette—No need to put your velvet headbands away in mothballs just because barrettes are in. Snap your barrette over your band at one side. Lots of girls are going in for doubleheaders like this.

Barrette Boom—You see those silver bar barrettes on all the sleekest, slickest heads. Friends are giving them to each other instead of friendship links with names inscribed. Boy friends are giving them to their steadies instead of identification bracelets. Gals are giving them to themselves instead of investing in another silver bangle bracelet. It's a trend; it's a Fadshion!

STONEWALL 4-H CLUB

The 4-H Club of the Stonewall school held its monthly meeting Thursday, March 8. The president called the meeting to order and the secretary called the roll and read the minutes of the last meeting. Mrs. B. G. Anderson brought the seed to those who will have a victory garden and explained how to plant the seed. She also told about the county council which will meet in Appomattox in April. Me were very sorry that Mr. Alfred Price was sick and could not be with us at this meeting.

Draft Deferment
CARRIES A SOLEMN OBLIGATION

WHEN YOU ASK your draft board for deferment, you are asking them to send another man in your place. Some other man will have to endure the hardships of army life; to risk his life instead of yours; to live in a foxhole at army pay so you can continue to enjoy the comforts of home and a well-paid job.

That's a good deal to ask, isn't it?

The draft board gives you deferment only if they think you are doing a more important job than the man they send in your place.

A man who is engaged in critical work such as pulpwood production has a perfect right to ask for deferment. But having been given deferment, he has no more right to go AWOL from his job than the man who is serving in his place would have to desert in the face of the enemy. His deferment carries the obligation to serve his country as faithfully at home as the other man serves it at the front.

FIGHT FIRE!
America needs every tree! Needs its mature trees now for war. Will need its growing trees for peace. Don't let fire destroy them. Watch matches—cigarettes—fires.

How women and girls may get wanted relief from functional periodic pain
Cardui is a liquid medicine which many women say has brought relief from the cramp-like agony and nervous jitters of functional periodic distress. Here's how it may help:
1 Taken like a tonic, it should stimulate appetite, aid digestion, thus help build resistance for the "time" to come.
2 Started 3 days before, Cardui should help relieve pain due to purely functional periodic causes.
Try Cardui. If it helps, you'll be glad you did.

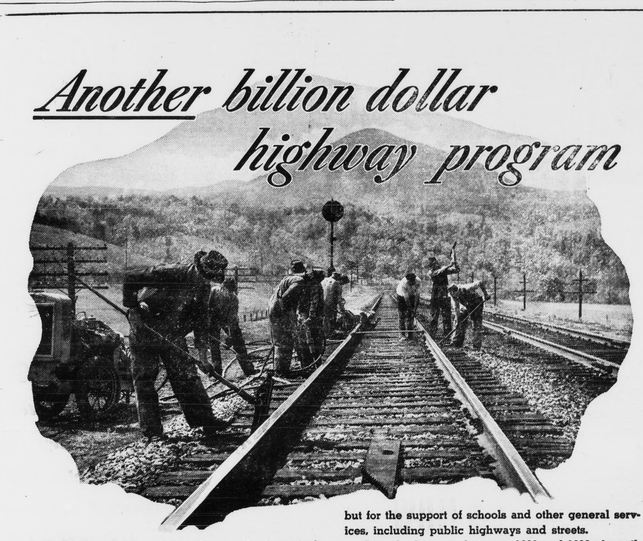
Another billion dollar highway program



In thinking about work after the war, don't overlook the 230,000 miles of steel "highways" which the railroads have built and maintain at their own expense. These "highways" provide jobs for more than a quarter of a million men working on construction and maintenance of tracks and roadway—jobs for more than a million other railroad workers — besides other thousands in mines, mills and forests where roadway materials and supplies are produced.

More than that—the railroads pay real taxes on these "highways," not for their own special benefit, but for the support of schools and other general services, including public highways and streets.

After the last war, between 1920 and 1930, the railroads spent more than four billion dollars for improvements on these "highways," and in addition more than three-and-a-half billion dollars for betterments in equipment. After this war, a similar program will be required.

So there's another highway program which could make a lot of postwar jobs, and which needs no more than a public policy of treating all forms of commercial transportation alike—letting each one pay its own way, which includes the payment of the general taxes upon which governmental services depend.

for the world's busiest highway

Over such highways—230,000 miles of them—more freight and passengers are moving today than ever moved before anywhere by any means of transport. In 1944, the railroads hauled nearly three times as much inter-city freight, and nine times as much war freight, as all other carriers combined. That is one of the great lessons to come out of the war. And one of the things to remember after the war is won is that America needs and must have the kind of transportation which only its railroads can deliver.
